EDUCATION

Arizona State University, Ira A. Fulton Schools of Engineering **GPA: 3.87/4.0**
Bachelors of Science in ***Computer Science****, Minor in* ***Data Science*** **May 2025**
Honors: New American University Scholarship, Dean's List (2021 - Present)
Coursework: Data Structures and Algorithms, Operating System, Object-Oriented Programming, Distributed Software Development, Design & Analysis of Algorithms, Theoretical Computer Science, Principles of Programming Languages, Software Integration and Engineering, Introduction to Human Computer Interaction
Activities and Clubs: Software Developer's Association, Python Users Group, Indian Students' Association.

WORK EXPERIENCE

Computer Science, *Ira A. Fulton Schools of Engineering* *August 2023 – Present*

- Provide tutoring sessions to 20+ undergraduate students in Computer Science courses, fostering their understanding of intricate concepts and problem-solving strategies.
- Collaborate closely with colleagues and faculty to devise innovative tutoring methodologies and resources, enhancing student learning outcomes through teamwork and creativity.

Building Manager, *Memorial Union, Arizona State University* *January 2022 – Present*

- Oversee daily operations and ensure the smooth functioning of a 253,000 square feet facility, catering to over 5,000 students on a daily basis.
- Supervise 30+ student employees and manage the execution of 300+ events within a one-year timeframe, demonstrating strong organizational and leadership skills.

SKILLS

- **Programming Languages**: Java, C/C++, C#, Python, JavaScript, Go, SQL, R, MATLAB, TypeScript
- **Libraries/Frameworks:** HTML, CSS, Bootstrap, XML, Django, DOM, WSDL, ASP.NET, React.JS
- **Tools/Databases/Others:** MySQL, GitHub, Windows, MacOS, Visual Studio Code, Linux, JSON, Docker

RELEVANT PROJECTS

Car Rental System July 2024

- Designed and developed the backend using **C++** and **SQLite** to handle user management, car listings, booking system, and rental management functionalities.
- Implemented data synchronization for car availability and bookings, ensuring users always had up-to-date information.

Integrated Service Management Web Application December 2023

- Developed an **ASP.NET** web app for service management, user data, and weather integration using WSDL, SOAP, and **REST APIs**.
- Enhanced user experience with cookies and implemented member management and staff authorization using **XML** and **C#**

Fine Motor Skill (FMS) Development Website December 2021

- Conceptualized and crafted a website comprising interactive games utilizing **HTML** front-end and **JavaScript** back-end to aid individuals recovering from stroke in redeveloping their fine motor skills.
- Collaborated with a team of three undergraduate students to debug code and refine **GUI** for enhanced intuitiveness and suitability to the target audience.

Store Management System March 2021

- Integrated **Python** and **MySQL** with modules and libraries to develop a **data management** program for tracking revenue, expenses, and stock over a fiscal year.
- Utilized libraries in Python and **created modules** to save the data of 3,000+ customers into a **centralized database** for easy access.
